DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Host materials according to Formula VI (shown in claim 1). Applicant should elect a single species of Formula VI by indicating the following:

If X is Si, Ge, Sn, Pb, Se, Ti, Zr, or Hf,

If Y is phenyl, alkyl, cycloalkyl, or Ar'-A-Ar''. If the Ar'-A-Ar'' group is selected for Y, then an aromatic group for each of Ar' and A'' should be indicated. Furthermore, the A group should be further selected from alkyl, cycloalkyl, -O-, or Si(R')(R'');

If Ar¹, Ar², and Ar³ are unsubstituted or substituted alkyl or aromatic group. Applicant should further indicate the alkyl group or aromatic group respectively of each Ar¹, Ar², and Ar³ group. If substituted, the substituent group should be selected from those listed in claim 1. If a substituent comprising an R group is selected, then applicant should indicate if R is alkyl, alkenyl, aryl, or aralkyl.

2. Applicant should indicate an ultimate species representative of the elected species for search purposes.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1 is considered to be generic.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was not made to request an oral election to the above restriction requirement due to the complexity of the application.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
